

WINTER 2010
REAL ESTATE
WRAP UP
FOR REAL ESTATE PROFESSIONALS

As 2010 draws near we can all reflect on the wet weather that we had through much of the spring and summer. This type of weather kept our staff at Thrasher Basement Systems busy, and I am told that it kept property managers and real estate professionals on their toes as well.

Nothing can be more frustrating than having a basement or foundation problem when you are trying to close a deal or satisfy a tenant. Due to the increased demand, we have multiplied our staff and have professionals dedicated to the real estate industry. We do our best to give you the quickest service and the best prices available.

If you haven't utilized our services on a project in the past, I encourage you to check us out. You might be surprised how well a project can go, and we will do our best to "wow" your client or tenant. Our services are very competitive, but we don't shortcut on solutions. Our goal is to make this problem go away permanently.

Another benefit to working with Thrasher is our 8 service technicians. They are ready and waiting to handle a problem quickly if it arises. These trained professionals are on call and ready to assist in an emergency, and there is no other company in the area that has been solving basement problems since 1975. This means we will be here to stand behind our work for the long term.

I hope you all have a great holiday season, and a great year in 2011!

Employee Spotlight - Kate Spielman

Kate Spielman has extensive experience in both residential and commercial construction. Prior to her employment with Thrasher, Kate spent six years performing property restoration on structures damaged by fire, flood or other peril for the region's largest contracting firm.

Since starting at Thrasher, Kate has completed comprehensive training and is certified in basement waterproofing, foundation repair, radon measurement and mitigation.

**Certified Waterproofing,
Foundation, and Radon Specialist**
